

## 2019 COURSE INFORMATION FOR REFRESHER - FORKLIFT

# Refresher - Forklift

## TLID2010 Operate a Forklift (Refresher Training)

### Course Delivery

FACE TO FACE - at our site in Wetherill Park (see our course calendar for scheduled dates)

FACE TO FACE - at your site (providing you have adequate training areas, resources and participants)

### Course Duration

4 hours

### Course Cost

**\$1,200** per session (GST free) for a group of up to 6 people

### Course Prerequisites

Participants must have a valid Australian High Risk Work forklift licence class LF.

### Course Overview

Forklift refresher training is aligned to the accredited unit of competency TLID2010 Operate a Forklift and is a half day (approx. 4 hours) training session conducted at your site (or ours) for already licensed operators. Training sessions are for a maximum of 6 people per group. Operators attending a 'refresher' course MUST produce their current forklift licence and proof of identification on the training day. Training will not be conducted without such evidence.

If you do not have a valid forklift licence, you must enrol in a formal training course (TLILIC2001), delivered by a Registered Training Organisation (such as Cobra Training Services). When you have achieved sufficient skills and competencies, you will be eligible for a LF licence assessment by a SafeWork NSW qualified assessor.

Forklift refresher training should be conducted on a regular basis and is designed to update the operator's theory knowledge; refresh practical skills, and improve operating techniques/procedures on the forklifts.

Benefits of training include: reinforces safe work practices, provides updates and changes to legislation, increases productivity and bottom line and assists in minimising the risk of damage/injury to property and persons.

### Course Content

- Revision of forklift operators' theory knowledge and practical skills
- Hazard identification and risk assessment – plan work
- Conduct routine checks – conduct pre and post operational checks
- Shift loads safely
- Shut down and secure forklift truck
- Assessment of the safe application of knowledge and skills to workplace tasks

### Course Outcomes

On successful completion of this course, participants meeting the assessment criteria will be issued a Statement of Attainment in TLID2010 Operate a Forklift.

There are currently no dates available for this course.
