Course Overview

Working at Heights training course is suitable for any person who is required to work at any height. The course covers all aspects of safe access to heights, legislative requirements, selection use and maintenance of personal protective equipment (including correct use and fitting of safety harnesses), along with practical exercises of setting up fall arrest systems and the rescue of a suspended casualty.

Height safety training includes an overview of legislation relating to working at heights, introduction to hazards and risks, correct use of harness and recovery procedure for fall arrest.

Course Content

Theory component includes:

- Work at Height Regulations / PPE regulations
- Health and Safety at Work Act
- AS/NZ and EN Standards
- Hazard Analysis and Risk Assessment
- Work restraint and positioning
- Fall Arrest
- Inspection and record keeping procedures

Practical component includes:

- Identification and inspection of equipment using samples
- The correct fitting of harnesses
- The correct use of ladders, lanyards, anchor straps
- The Gotcha Rescue System
- The correct and safe storage of equipment

Course Outcomes

By the end of this working at heights training course, participants will be able to: identify work requirements, identify work procedures and instructions for the task,
